

Glulam Header Beams

Our stock glulam headers are a 2100Fb 1.8E SPF beam finished to full framing widths for simplicity and ease of use. This beam is used when appearance is not important.

Applications: Garage doors, windows, patio doors, prefab wall manufacturers.

Widths: 3 1/2", 5 1/2", 7 1/4"

Lengths: Stock 48', available up to 62'

Custom Glulam Beams

Our custom beams are designed for specific customer applications. We can make a variety of custom widths, depths, lengths, and appearances. Species include: SPF, SYP, Doug Fir/Larch, and Cedar. Uses include ridge beams, rafter beams, and large door/header applications.

Widths: 3 1/4" to 9 1/4"

Depths: 5 1/2" – 30"

Lengths: up to 62'

Treated Glulam Beams

Treated Glulam Beams can be used in applications where the beam will be exposed to weather, insects, sunlight, and high moisture content. Great for decks, eliminate posts for a clear view, bridge girders, and splines for SIP panels.

Glulams are made from Southern Yellow Pine and are a Combination #49. Ask about the many different treatment options.

Widths: 3 3/8", 5 3/8", 7 1/8", 9 1/8" (other widths available)

Depths: From 8 1/4" to 30 1/4" in 1 3/8" increments.

Lengths: up to 62'

Finger Jointed Lumber

Need long length framing lumber? We can produce practically any specie and grade combination possible. Great for hand framed rafters & any application where long length lumber is needed.

Dimensions: 2 x 6, 2 x 8, 2x10

Lengths: 22' through 40'

Glulam Columns

Titan Wall™ and Titan Timbers™ are glulam columns designed for wall applications. Titan Wall columns are used in "tall wall" applications where superior strength is a must. Titan Wall columns are made from Doug Fir/Larch and are 2.0E.

Dimensions: 5-7/16", 7 1/8"

Depths: 4 1/2", 6", 7 1/2"

Lengths: up to 62' in 2' increments.

Treated Glulam Columns

Titan Timbers™ come treated on the bottom 6' for ground contact. Additional treatment lengths are available including full treatment. This column replaces solid timbers and nail-laminated products in the post-frame market. Columns are designed around specific structural requirements.

Dimensions: 3 & 4 ply 2x6, 2x8, and 2 x10

Lengths: up to 62'

Titan Truss

Perfect for entry ways, dormers, and open cabin roof systems, Titan Trusses™ offer the boldness of heavy glue lam cords and the elegance of flat black gang plates. Trusses are available in lengths up to 40' clear span, in a variety of species.

Porch posts

These decorative posts are used in exposed applications when a straight, dimensionally stable post is desired. The post is made from high grade, kiln dried lumber to resist cracks, warping, and twisting. Ideal for porches any exposed application.

Dimensions: 5 1/4" x 5 1/2"
